BBA

**Bioenergetics**
(including Reviews on Bioenergetics)
Vol. 1183, 1994

# Cumulative Contents

*Information for Contributors* vii

## *Nomenclature Proposal Document*

Transmembrane measurements across bioenergetic membranes
*T.P. Silverstein (USA) (in total 29 authors)* 1

## *Reviews*

Secondary solute transport in bacteria
*B. Poolman and W.N. Konings (The Netherlands)* 5

Effect of fatty acids on energy coupling processes in mitochondria
*L. Wojtczak and P. Schönfeld (Poland, Germany)* 41

## *Regular Papers*

Binding and interaction of the primary and the secondary electron acceptor quinones in bacterial photosynthesis. An infrared spectroelectrochemical study of *Rhodobacter sphaeroides* reaction centers
*M. Bauscher, M. Leonhard, D.A. Moss and W. Mäntele (Germany)* 59

The concerted reduction of the high- and low-potential chains of the *bf* complex by plastoquinol
*D.M. Kramer and A.R. Crofts (USA)* 72

Structure of a prasinoxanthin-chlorophyll *a/b* light-harvesting complex of the green flagellate *Pseudoscourfieldia marina* (Micromonadophyceae)
*M.W. Fawley (USA)* 85

Purification and characterization of an $O_2$-utilizing cytochrome-*c* oxidase complex from *Bradyrhizobium japonicum* bacteroid membranes
*R.G. Keefe and R.J. Maier (USA)* 91

Coupling mechanisms in active transport
*R.M. Krupka (Canada)* 105

Coupling mechanisms in ATP-driven pumps
*R.M. Krupka (Canada)* 114

Interactions among the Photosystem II oxygen-forming complexes: a novel model for damping of $O_2$ oscillations
*D. Mauzerall and Z. Dubinsky (USA, Israel)* 123

The genes in the thermophilic cyanobacterium *Synechococcus vulcanus* encoding cytochrome-*c* oxidase
*N. Sone, H. Tano and M. Ishizuka (Japan)* 130

The electronic structure of the primary donor cation radical in *Rhodobacter sphaeroides* R-26: ENDOR and TRIPLE resonance studies in single crystals of reaction centers
*F. Lendzian, M. Huber, R.A. Isaacson, B. Endeward, M. Plato, B. Bönigk, K. Möbius, W. Lubitz and G. Feher (Germany, USA)* 139

The proton pumping activity of $H^+$-ATPases: an improved fluorescence assay
*H. Rottenberg and R. Moreno-Sanchez (USA)* 161

Direct transmembraneous reconstitution of bacteriorhodopsin into planar phospholipid bilayers
*E. Muneyuki, M. Ikematsu, M. Iseki, Y. Sugiyama, A. Mizukami, K. Ohno, M. Yoshida and H. Hirata (Japan)* 171

Inorganic phosphate is the major component of the thermostable cytoplasmic fraction which stimulates mitochondrial anion uniport
*L.T. Ng, M.J. Selwyn and H.L. Choo (Singapore)* 180

Detrapping of excitation energy from the reaction centre in the photosynthetic purple bacterium *Rhodospirillum rubrum*
*K. Timpmann, F.G. Zhang, A. Freiberg and V. Sundström (Sweden, Estonia)* 185

A study of Photosystem II fluorescence emission in terms of the antenna chlorophyll-protein complexes
*R.C. Jennings, F.M. Garlaschi, R. Bassi, G. Zucchelli, A. Vianelli and P. Dainese (Italy)* 194

Modifications by $Na^+$ and $K^+$, and the site of $Ag^+$ inhibition in the $Na^+$-translocating NADH-quinone reductase from a marine *Vibrio alginolyticus*
*T. Unemoto, T. Ogura and M. Hayashi (Japan)* 201

## *Short Sequence-Paper*

Cloning and sequencing of a corn (*Zea mays*) nuclear gene coding for the chloroplast specific catalytic subunit of ferredoxin-thioredoxin reductase
*S. Marc-Martin, A. Spielmann, E. Stutz and P. Schürmann (Switzerland)* 207

## *Rapid Reports*

Photosynthetic water oxidation under flashing light. Oxygen release, proton release and absorption transients in the near ultraviolet – a comparison between thylakoids and a reaction-centre core preparation
*K. Lübbers, M. Haumann and W. Junge (Germany)* 210

Redox titration of multiple protein phosphorylations in pea chloroplast thylakoids
*T. Silverstein, L. Cheng and J.F. Allen (Sweden)* 215

## *Reviews*

Thermodynamic considerations in constructing energy balances for cellular growth
*U. Von Stockar, L. Gustafsson, C. Larsson, I. Marison, P. Tissot and E. Gnaiger (Switzerland, Sweden, Austria)* 221

Proton translocation mechanism and energetics in the light-driven pump bacteriorhodopsin
*J.K. Lanyi (USA)* 241

## *Regular Papers*

The [2Fe-2S] centre of the cytochrome *bc* complex in *Bacillus firmus* OF4 in EPR: an example of a menaquinol-oxidizing Rieske centre
*A. Riedel, E. Kellner, D. Grodzitzki, U. Liebl, G. Hauska, A. Müller, A.W. Rutherford and W. Nitschke (Germany, France)* 263

Oxidation-reduction potential dependence of formate binding to Photosystem II in maize thylakoids
*A. Stemler and P.A. Jursinic (USA)* 269

The relationship between the capacity to evolve oxygen and the variable fluorescence of chlorophyll after microsecond illumination in *Chlorella*, pea leaves and pea thylakoids
*P.A. Jursinic and R.J. Dennenberg (USA)* 281

Properties of the primary and secondary quinone electron acceptors in RC/$LH_1$ complexes from the purple sulfur bacterium *Ectothiorhodospira mobilis*
*T. Leguijt, P. Parot, A. Verméglio, W. Crielaard and K.J. Hellingwerf (The Netherlands, France)* 292

Isolation and characterisation of the core light-harvesting complex B875 and its subunit form, B820, from *Rhodocyclus gelatinosus*
*V. Jirsakova and F. Reiss-Husson (France)* 301

Oxidative turnover increases the rate constant and extent of intramolecular electron transfer in the multicopper enzymes, ascorbate oxidase and laccase
*G. Tollin, T.E. Meyer, M.A. Cusanovich, P. Curir and A. Marchesini (USA, Italy)* 309

Loss of the trans-thylakoid proton gradient is an early event during photoinhibitory illumination of chloroplast preparations
*S.E. Tjus and B. Andersson (Sweden)* 315

Kinetic study of the quenching reaction of singlet oxygen by biological hydroquinones and related compounds
*K. Mukai, S. Itoh, K. Daifuku, H. Morimoto and K. Inoue (Japan)* 323

Metabolite levels in the chloroplast and extrachloroplast compartments of barley leaf protoplasts during the initial phase of photosynthetic induction
*P. Gardeström (Sweden)* 327

Stabilization of Photosystem II particles isolated from the thermophilic cyanobacterium *Phormidium laminosum* with glycinebetaine and glycerol
*C. Stamatakis and G.C. Papageorgiou (Greece)* 333

Modulation of $\Delta$pH-dependent nonphotochemical quenching of chlorophyll fluorescence in spinach chloroplasts
*G. Noctor, A.V. Ruban and P. Horton (UK)* 339

Effect of Photosystem II reaction centre closure on fluorescence decay kinetics in a cyanobacterium
*C.W. Mullineaux and A.R. Holzwarth (Germany)* 345

The rate of cytochrome $c_2$ photooxidation reflects the subcellular distribution of reaction centers in *Rhodobacter sphaeroides* Ga cells
*A. Verméglio, P. Joliot and A. Joliot (France)* 352

Characteristics of cyclic electron transport in the cyanobacterium *Phormidium laminosum*
*R.S. Manasse and D.S. Bendall (UK)* 361

Resonance Raman spectroscopy of the B820 subunit of the core antenna from *Rhodospirillum rubrum* G9
*R.W. Visschers, R. Van Grondelle and B. Robert (The Netherlands, France)* 369

Effects of $\pi-\pi$ interactions on the $^1$H-NMR spectra and solution structures of pheophytin *a* and *a'* dimers
*P.H. Hynninen and S. Lötjönen (Finland)* 374

Hydrogen bonding of water to chlorophyll *a* and its derivatives as detected by $^1$H-NMR spectroscopy
*P.H. Hynninen and S. Lötjönen (Finland)* 381

Picosecond time-resolved fluorescence studies on photoinhibition and double reduction of $Q_A$ in Photosystem II
*I. Vass, G. Gatzen and A.R. Holzwarth (Hungary, Germany)* 388

Characteristics of the assembly of the 33 kDa oxygen-evolving complex protein in the etioplasts and the developing chloroplasts of barley seedlings
*A. Hashimoto, T. Akasaka and Y. Yamamoto (Japan)* 397

The role of ascorbic acid in photosynthetic electron transport
*G. Forti and A.M. Ehrenheim (Italy)* 408

*Rapid Report*

Bacteriochlorophyll aggregates in positively charged micelles
*J. Gottstein, A. Scherz and H. Scheer (Germany, Israel)* 413

*Reviews*

Bioenergetic aspects of the translocation of macromolecules across bacterial membranes
*R. Palmen, A.J.M. Driessen and K.J. Hellingwerf (The Netherlands)* 417

A dialogue on $Ca^{2+}$ oscillations: An attempt to understand the essentials of mechanisms leading to hormone-induced intracellular $Ca^{2+}$ oscillations in various kinds of cell on a theoretical level
*J.W. Stucki and R. Somogyi (Switzerland)* 453

*Regular Papers*

Probing the B800 bacteriochlorophyll binding site of the accessory light-harvesting complex from *Rhodobacter sphaeroides* using site-directed mutants. I. Mutagenesis, effects on binding, function and electrochromic behaviour of its carotenoids
*W. Crielaard, R.W. Visschers, G.J.S. Fowler, R. Van Grondelle, K.J. Hellingwerf and C.N. Hunter (UK, The Netherlands)* 473

Probing the B800 bacteriochlorophyll binding site of the accessory light-harvesting complex from *Rhodobacter sphaeroides* using site-directed mutants. II. A low-temperature spectroscopy study of structural aspects of the pigment-protein conformation
*R.W. Visschers, W. Crielaard, G.J.S. Fowler, C.N. Hunter and R. Van Grondelle (The Netherlands, UK)* 483

The proton activity at cryogenic temperatures – a possible influence on the spin state of the heme iron of cytochrome $P\text{-}450_{cam}$ in supercooled buffered solutions
*H. Schulze, O. Ristau and C. Jung (Germany)* 491

Effects of deletions in the *uncA-uncG* intergenic regions on expression of *uncG*, the gene for the $\gamma$ subunit of the *Escherichia coli* $F_1F_o$-ATPase
*E. Angov and W.S.A. Brusilow (USA)* 499

Structure of the binuclear heme iron-copper site in the quinol-oxidizing cytochrome $aa_3$ from *Bacillus subtilis*
*L. Powers, M. Lauraeus, K.S. Reddy, B. Chance and M. Wikström (USA, Finland)* 504

An NADH-diaphorase is located at the cell plasma membrane in a mouse neuroblastoma cell line NB41A3
*R. Zurbriggen and J.-L. Dreyer (Switzerland)* 513

Flash photolysis of the carbon monoxide compounds of wild-type and mutant variants of cytochrome *bo* from *Escherichia coli*
*S. Brown, J.N. Rumbley, A.J. Moody, J.W. Thomas, R.B. Gennis and P.R. Rich (UK, USA)* 521

The plastoquinone diffusion coefficient in chloroplasts and its mechanistic implications
*M. Blackwell, C. Gibas, S. Gygax, D. Roman and B. Wagner (USA)* 533

*Short Sequence-Papers*

Molecular cloning of hydrogenosomal ferredoxin cDNA from the anaerobic amoeboflagellate *Psalteriomonas lanterna*
*S. Brul, R.H. Veltman, M.C.P. Lombardo and G.D. Vogels (The Netherlands)* 544

Molecular cloning, sequencing and expression of cDNA encoding human coproporphyrinogen oxidase
*S. Taketani, H. Kohno, T. Furukawa, T. Yoshinaga and R. Tokunaga (Japan)* 547

Molecular cloning and nucleotide sequencing of *Schizosaccharomyces pombe* homologue of the class II fructose-1,6-bisphosphate aldolase gene
*N. Mutoh and Y. Hayashi (Japan)* 550

Nucleotide sequence of a rice root ferredoxin-$NADP^+$ reductase cDNA and its induction by nitrate
*H. Aoki and S. Ida (Japan)* 553

Cloning and sequencing of the gene encoding spinach ferredoxin-dependent glutamate synthase
*B. Nalbantoglu, M. Hirasawa, C. Moomaw, H. Nguyen, D.B. Knaff and R. Allen (USA)* 557

*Retraction* 563

*Cumulative Contents, Vol. 1183* 565

*Author Index* 569
